

REACH Compliance Statement

Regulation No 1907/2006/EC

* Including relevant Amendment / Additions

Dura Magnetics, Inc. is committed to operating in an environmentally, socially, and ethically responsible manner, complying with all applicable laws and regulations of countries in which we do business. This commitment includes meeting the requirements of REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals), a law that went into force June 1, 2007 in the European Union and which is regulated by the European Chemicals Agency (ECHA). Its purpose is to reduce the risk of harmful effects that the use of chemical substances can cause to human health and the environment.

- Currently there are 240 Substances of Very High Concern (SVHC) on the ECHA's Candidate List, last update January 23, 2024. This list can be viewed by following the link: <https://echa.europa.eu/candidate-list-table>
- Under the structure of the REACH Regulation, Dura Magnetics, Inc. is a manufacturer and supplier of "Articles" (Magnets and Magnetic parts). We do not manufacturer or supply "substances" or "mixtures" and our articles do not involve the "intentional release of substances".
- By the Engineering evaluation, Chemical testing, and supplier declarations, it is determined, that the "articles" supplied by Dura Magnetics, do not contain SVHCs above the threshold value (>0.1% by weight per article), as declared by the ECHA, to the best of Dura's knowledge.
- Dura Magnetics, Inc. remains vigilant in reviewing the Candidate list for SVHCs as it continues to be expanded upon by the ECHA.
